

### **NameError: name 'Aer' is not defined**

If you are getting the following error:

NameError: name 'Aer' is not defined

Step 1: You have to install the package Aer

Go to Anaconda Prompt and issue the command

1. `pip install qiskit-aer`

Step 2: Then go to jupyter notebook, in the import section, add

`from qiskit_aer import Aer`

Step 3: Kernel >> Restart Kernel

Then try to run again Run >> Run All Cells, and the error will be resolved
